

# HOPE

**V 1:**

**D 5**                      **A/G**

Why do we get so down hearted  
How could we think love departed  
There's an anchor strong within us  
There's a cornerstone to hold us

**D hold the chord**              **G hold**

Hope... call it up now    Hope... call it up now

**V 2: Same chords**

Tossed upon the stormy seas of  
life we're on our knees our cries are  
please for some relief to set us free  
when all we need's right here oh

**D hold**                      **G hold**

Hope... call it up now    Hope... call it up now

**E hold**                      **A hold**

Hope... call it up now    Hope... call it up now

**V 3:**

**E5**                      **B/A**

We all know these days are hanging  
By a thread and all these changes  
May not be the answer we need  
Only one thing now will stay us

**Chorus:**

**E**                                      **A**

Hope... call it up now    Make it alive

We've got to reach inside for

**C#m**                                      **A**

Hope    Won't let us down    No room for doubt

Got to believe He's in us

**Bridge**    Christ the Hope of Glory ... *same chords as last chorus*
